

EMMETT Technique Practitioner training – Modules 1&2

Presented by: Sue Gassick

Glasgow: Oct 1 & 2, 2014

Inverurie: Oct 17 & 18, 2014

Kirkcaldy: 25 & 26 February 2015

The EMMETT Technique is a safe and simple muscle release technique that is designed to relieve pain and discomfort. Developed by Ross Emmett, the technique involves light touch on specific points to create instant change.

The technique can be used in a truly complementary way with any other bodywork or exercise system, and as a standalone therapy. It

is enthusiastically embraced by the chiropractors that have already trained in it.

The Practitioner training begins with Modules 1&2 as a two-day block. No previous EMMETT experience or training is necessary. There are no exams or case studies involved. The full course comprises of 6 modules, 11 days in total.

Functional Integrated Dry Needling For Sports Injury Management
Mark

Present by: Dr.
Scappaticc

i
Ireland, August 15 to 17, 2014

Dublin,

Frankfurt, Germany, August 22 to 24, 2014

The Sports Injury Management Training Program helps participants develop the knowledge and clinical skills required to effectively assess and treat common, challenging and difficult to treat sports injuries. This program reviews detailed functional anatomy and the pathomechanics of common sports injuries and is designed to ensure that clinicians are able to deploy unique needling techniques to manage complicated sports injuries.

This 3-day intensive program is designed for participants with prior needling experience or who have completed the FIN Pain Management Training. This program includes a review of functional biomechanics and includes integrated dry needling and soft tissue treatment techniques. Some self-study pre-workshop learning is also required.
